

PLC Programmer – Direct Air Capture Systems

We are seeking a talented automation controls engineer for our team in the field of Direct Air Capture (DAC) Engineering. As a software developer, you will play a critical role in developing and optimizing DAC technologies to combat climate change and reduce carbon emissions

RESPONSIBILITIES:

- Develop and implement automation systems according to IEC 61131 in the PLCnext Engineer programming environment for our Direct Air Capture systems.
- Work together with electrical engineers, machine builders and technicians to design your automation systems in the best possible way for the project.
- Design and configure Human-Machine Interfaces (HMIs) for operators to monitor and interact with the automated systems. Create intuitive graphical interfaces for real-time data visualization, alarm management, and system diagnostics using software tools compatible with PLCnext System.
- Diagnose and resolve issues related to automation control systems by analyzing programs, electrical schematics, and mechanical components. Perform regular maintenance tasks such as software updates, calibration, and hardware replacement to ensure optimal performance and uptime.

Job ID: F-RO202402

- Identify opportunities for process optimization, cost reduction, and quality improvement within the automation systems. Propose and implement innovative solutions, such as predictive maintenance strategies or advanced control algorithms, to enhance productivity and reliability.

REQUIREMENTS:

- Bachelor's or Master's degree in industrial automation engineering or related field.
- Experience with IEC 61131 automation programming
- Strong knowledge in system integration and troubleshooting
- HMI development is desirable
- Experience with PLCnext is advantageous
- Excellent problem-solving skills and ability to work in a collaborative team environment.
- Strong communication skills, both written and verbal.

We offer competitive compensation, benefits, and the opportunity to work on cutting-edge technologies with a mission-driven team dedicated to addressing climate change. Additionally, we provide the flexibility of home office and mobile working options.

Join us and be part of the solution in shaping a more sustainable future!
